COOKWARE CLEANSER & POLISH

STAINLESS STEEL • PORCELAIN • CERAMIC • COPPER • ALUMINUM

Bar Keepers Friend® **Cookware Cleanser & Polish** is a premium quality cookware cleanser. Formulated with micro-abrasives and oxalic acid, it keeps stainless steel cookware looking new. Also gently cleans copper, ceramic and hard-anodized aluminum. Use it on your toughest cleaning jobs!

- Cooked-on food/stains.
- Mineral deposits.
- Tarnish & rust.
- Rack marks.
- Cuts through oils & grease.
- Scours, brightens & polishes in one application.
- Removes knife marks on porcelain plates.

Bar Keepers Friend Story

In 1882, an Indianapolis chemist noticed how clean and shiny his tarnished pot was after cooking rhubarb. Realizing an ingredient in the rhubarb (oxalic acid) was doing the cleaning, he formulated an oxalic acid-based cleanser and sold it to city taverns. It worked so well it became known as the "Bar Keepers Friend."

NSF Approved (A1, A3, A6)

Approved for food service kitchens and food processors.

- A1:** For use as general cleaning agent on all surfaces, or for use with steam or mechanical cleaning devices.
- A3:** Acid cleaner.
- A6:** Scouring cleaner.

Before using, food products and packaging materials must be removed from the room or carefully protected. After using, surfaces must be thoroughly rinsed with potable water.

For Institutional and Industrial Use

Read all Directions and Caution Statements on the product label before use. Material Safety Data Sheets are available at www.barkeepersfriend.com.

Directions

Bar Keepers Friend® Cookware Cleanser & Polish quickly removes food, stains, hard water deposits and tarnish. Sprinkle BKF on a wet sponge or cloth. Rub into soiled area. Rinse thoroughly. For difficult stains, make a paste and let it remain on the stain for no longer than one minute. Then rub gently and rinse. NOTE: Do not use on gold, silver (sterling silver is OK), or lacquered surfaces. For brushed finishes, polish in the direction of the brush lines.
